*»Photographers capturing glimpses of everyday life at school, all over the world. In these pictures one can see that it is, in all probability, the only major international school movement with universal elements in its curriculum on the one hand and strong references to the respective regional culture on the other. All around the world it seeks to serve what was, in one of the first complete overviews of Waldorf education, once called Education towards Freedom.« (Dr. Andreas Kaufmann)*

Rudolf Steiner (1861–1925), pioneer of anthroposophy, school founder, artist, and social reformer, has gained global recognition for his unparalleled creative power. His drafts for an alternative science, a new educational theory, and new perspectives in medicine and agriculture, have entered into the spiritual heritage of our time and, as an integral part of contemporary cultural life, continue to provide important impulses and inspiration.

**Please note:** These photographs have been copyright cleared for worldwide print and electronic reproduction in the context of reviews of the books only.

Print media: No more than THREE photographs plus the cover image from the selection can be used in total – they are not to be used on the cover or cropped. Online media may use a total of TWELVE images in a gallery.

The Freunde der Erziehungskunst Rudolf Steiner have been supporting Waldorf schools and curative institutions since 1976 in order to open up good educational opportunities for people all over the world. With success. Well over 600 institutions all over the world have been supported and accompanied by voluntary commitment to date.
